

“Is it private life?”

Every human has own individuality no matter what age he or she is. Every person lives his/her private life. Someone's private life is intensive, someone's is not but private life is untouchable. Privacy is adjusted by act such as the Universal Declaration of Human Rights proclaimed by UN. Article 12 of the Declaration says “No one shall be subjected to arbitrary interference with his privacy, family, home or correspondence, nor to attacks upon his honour and reputation. Everyone has the right to the protection of the law against such interference or attacks.” This article applies to children as well. Adult people have wrong belief that children have no privacy. But children have their privacy even some of them have more intensive private life.

Children are sensitive creatures. They do not like to share their secrets. Among child secrets could be violence, social status, information about parents. It's necessary to be delicate, to know right approach and never ask your close friends about it. Every person should understand this thing because there could be a fact which he/she do not want discuss with others. For example, being beware of scorn how HIV-infected person can say about his/her diagnosis even to close friends? He/she could be rejected by others. Can you imagine if it is you? What will you do in that case?

Private life can be compared with private business. Private business is protected by law. Private business has owner or owners, it works with other enterprises, and it has clientele. All this things are related to private life. Personal life has several owners too. How can it be? Everything is simple. Nowadays, it's available to hang up your thoughts in internet on the pages of “LiveJournal” or “My Space”. To safe private life is not possible. For some people others private life is way to have money. And we can not help it. Relative to celebrity this category of people includes detective agents and paparazzi. If it is concerns you, do not afraid to take friends into your confidence. If you trust your friends you can say them all your feelings. It could be your mother or other close people. But if you don't want someone get learned about it you can write it down on paper. Do not place it on internet pages!

Nevertheless private life is not private enough!!! This is our world – venal and private!!!
