

WHAT IS PRIVACY?

Privacy is something which is only yours, which concerns only you! It is something we have been building our entire life.... We share privacy only when we are sure that it will remain a big secret forever... And the only person you will share it with is your best friend... It can be a boy or a girl... Privacy is your own room, your love SMS messages, notes, letters that you got from someone dear to you; your diary, your talks, your thoughts... All this is privacy. I will build my privacy with the person I really care about, with the person that I would want to spend my life with...

Privacy is precious and should therefore not be destroyed but build and cherished from one day to another!
